Terms of service

1. You may want to use Code Output freely, without worrying that Acoder or its owner/owners might claim it. "Code Output" means the source code generated by Acoder in response to your (or your end users') task description. However, Acoder might store the source code in its database for the purpose of improving the application.

3. You are responsible for the content you create and anything you do with the assistance of Acoder.

4. When using Acoder console application, the application needs to send the source code files that you include in the task description to the Acoder server and to the OpenAI server in order to be able to do its job. By using Acoder, you agree to send the files (that you put in the task description of the task that you use Acoder application for) to the Acoder server and to the OpenAI server. By using Acoder, you also confirm that you own the necessary rights to the code and you have the rights to send that source code to the Acoder server (e.g. you are not forbidden to do so by any non-disclosure agreement or any licence or anything else). Acoder and OpenAI might store the source code in its database for the purpose of improving and maintaining their products.

5. By accepting this terms of service, you agree to receive emails about Acoder or related projects (you will receive maximally one email in 2 months and you can unsubscribe from those emails if you want, by clicking "Unsubscribe" at the bottom of the email).
